

# generator-react-class

npm package 2.3.0

build unknown

dependencies up to date

coverage unknown

Creates a react class js file, a test js file, and a sass file.

## Installation

First, install [Yeoman](#) and generator-react-class using [npm](#) (we assume you have pre-installed [node.js](#)).

```
npm install -g yo
npm install -g generator-react-class
```

Then generate your new project:

```
yo react-class
```

## Running your project

You will need to install gulpjs, and nodemon globally.

```
npm install -g gulp
npm install -g nodemon
```

Running in development mode

```
npm run dev
```

## NODEMON Known Issue

In the generated node app, there is a problem in the `npm run dev` script that currently requires you to run `npm run dev` twice.

## Getting To Know Yeoman

- Yeoman has a heart of gold.
- Yeoman is a person with feelings and opinions, but is very easy to work with.
- Yeoman can be too opinionated at times but is easily convinced not to be.
- Feel free to [learn more about Yeoman](#).
