A New Way to Design

and a way to become vendor independent

Rt0s Global Limited, UK

Start:

- Have product idea realisable with ARM Cortex MCU.
- Send RFQ to multiple MCU Vendors.
- Make a guess which one suits your requirements.

Resolution:

- Pick one vendor and ARM MCU.
- Purchase devkit and initial stock for prototypes.
- Get personnel and train to use vendor provided development environment.

arm

Start:

- Have product idea realisable with ARM Cortex MCU.
- Define MCU Requirements of the Application.

Resolution:

- Filter suitable ARM Chips matching your requirements.
- Check availability and prices history from our database.
- Choose one or several MCU:s that suit your targets.
- Develop your product concurrently on multiple MCU:s.
- Manufacture your product depending on availability
